

The ROQUETTE PHARMA TEAM wishes you
a Merry Christmas and a New Year
full of innovations.

This printable oral dispersible starch film is
an example of a patient-friendly dosage form
with a vast potential to convey data and brand recognition.

LYCOAT® oral dispersible films,
Roquette's new enabling technology

Other than the obvious drug delivery function, the new **LYCOAT® ORAL DISPERSIBLE FILMS** dosage form enables an entire new set of benefits:

- A dosage form with instant dissolution in mouth and quick onset of action
- A portable dosage form for people on the move
- An amusing dosage format appealing to children
- An easy-to-swallow dosage form for elderly people
- An effective dosage form for challenging patients and even possible for an easy administration for veterinary uses
- Printable information directly on the dosage form enabling brand identification and drug data or patient data literally *on* the dosage form
- Potential for range extension in the life-cycle management of existing drugs

With Roquette's proprietary **LYCOAT® ORAL DISPERSIBLE FILMS** dosage form, it is easy to formulate a high quality orally dispersible film with technology advantages:

- Simple and stable formulations
- Highly transparent and directly printable films

This concept of printable films can also be used in over-the-counter medications, oral care breath fresheners or even confectioneries!
