

*As you are aware a new excipient was launched in 2001 by Meggle and Roquette: **STARLAC®**.*

***STARLAC®** is a co-processed one body compound containing starch and lactose which has a remarkable impact on pharmaceutical formulations because the properties of **STARLAC®** exceed by far those of its two basic initial components.*

**Therefore we are organising a**  
***“Call for Papers”***

***Please submit a 2 pages abstract containing experimental data.***

*An independent scientific jury will assess the papers concerning their scientific performance, and **an award will be given to the most original paper.***

*In case you need samples of **STARLAC®**,  
please contact us at:*

*[www.roquettepharma.com](http://www.roquettepharma.com)*

*Roquette reserves the right to postpone, to cancel, or otherwise to change the conditions of this call for papers.*
